Method:

Many companies receive contracts as both large and small businesses. If a company received small business contracts in violation of the SBA's size standards, it was included in our list. Anomalous entries are highlighted in red and accompanied with an explanation.

Statistics from the research:

- 79 of the top 100 are large firms with five firms as anomalies = 84%
- Dollar total of the top 100 = \$14,818,755,405
- Dollar total of 79 large firms and five anomaly firms = \$11,197,766,085
- Percent of dollar total to large firms = 75.5%

Conclusion:

This most recent report from the ASBL shows that once again, large companies are the fraudulent recipients of a large portion of federal small business contracts. This practice is disastrous to our economy and hurting the American people. The ASBL urges leaders to enforce renewed oversight and monitoring of federal small business programs.
